The statistics for this report were collected and compiled by the Uniform Crime Reporting Unit of the Central Records Division.

We would like to take this opportunity to thank the staff of the Office of Criminal Justice Statistical Analysis Center for their timely assistance during the report preparation.

FOREWORD

This year's publication is the 22nd annual report issued by the Department of State Police, and it is the only comprehensive accounting of all the reported crimes in Michigan.

Uniform Crime Reporting is an attempt to collect meaningful data concerning the occurrence of crime, and although it is not a perfect benchmark, it does represent a disciplined effort which has become a yardstick for public evaluation of criminal activity in Michigan.

The format of this year's report is very similar to that of last year's, except that data for several more agencies are presented. This consistency should aid the report users when making comparisons of previous years data.

We wish to thank the 572 contributing law enforcement agencies for their cooperation, and we are confident that by working together we will continue to effectively serve the people of Michigan.

ACT 319

PUBLIC ACTS 1968

AN ACT to provide a uniform crime reporting system; to provide for the submitting of such report to the department of state police; to require submission of the report by certain police agencies; to require the reporting on wanted persons and stolen vehicles; and to vest the director of the department of state police with the authority to prescribe the reporting form and its content.

The People of the State of Michigan enact:

Sec. 1. The police department of each city or village, any duly constituted police department of a township, and the sheriff's department of each county once each month upon a date and form prescribed and furnished by the director of the department of state police, shall forward to the department of state police a crime report. Each reporting department shall report only on cases within its jurisdiction and upon which it is making, or has made, the primary police investigation. The report shall be called the uniform crime report and shall cover crimes reported and otherwise processed during the month preceding the month of the report. It shall contain the number and nature of offenses committed, the disposition of such offenses and such other information as the director of state police shall specify relating to the method, frequency, cause and prevention of crime. Under no circumstances shall the name of any person be reported.

Sec. 2. Upon receipt of the monthly uniform crime reports from the reporting agencies, the department of state police shall prepare a statewide compilation of the statistics contained therein and the resulting statistical compilation shall be available to any governmental law enforcement agency in the state, the judiciary committees of the Michigan state senate and the Michigan state house of representatives, and the federal bureau of investigation, upon request. The statistics made available through the uniform crime report shall be used for the purpose of studying the causes, trends and effects of crime in this state and for intelligence upon which to base a more sound program of crime detection and prevention and the apprehension of criminals.

Sec. 3. Any governmental police agency, not falling within the description of those required to submit the monthly uniform crime report set forth in section 1, which desires to submit such a report, shall be furnished with the proper forms by the department of state police. When a report is received by the department of state police from a governmental police agency not required to make such report, the information contained therein shall be included within the monthly compilation provided for in section 2.

Sec. 4. The chief of police of each city or village and of each township having a police department, and the sheriff of each county within this state, shall report to the department of state police, in a manner prescribed by the department, all persons wanted by, and all vehicles stolen from, their primary police jurisdictions. The report shall be made as soon as is practical after the investigating department either ascertains that a vehicle is stolen or obtains a warrant for an individual's arrest or determines that they have reasonable grounds to believe that the individual committed a crime. In no case shall this time exceed 12 hours after the reporting agency determines that it has grounds to believe that a vehicle was stolen or that the wanted person should be arrested.

Sec. 5. When at any time after making a report required by section 4 it is determined by the reporting agency that a person is no longer wanted because of his apprehension, or any other factor, and when a vehicle reported stolen under section 4 is recovered, the chief of police or sheriff of the reporting agency shall immediately notify the department of state police in a manner prescribed by the department.

Sec. 6. The provisions of this act do not apply to misdemeanor traffic cases or to persons wanted for misdemeanor traffic offenses, or for the violation of any city, village or township ordinance. The provisions of this act shall not be construed to in any way affect existing or future laws and procedures governing the reporting of persons wanted for traffic law violations or for the violation of city, village or township ordinances.

This act is ordered to take immediate effect.

THE MICHIGAN UNIFORM CRIME REPORTING SYSTEM

Michigan began its program to collect crime statistics from around the State in 1959 when the State Police requested each police and sheriff's agency to voluntarily submit crime data to its headquarters for purposes of forming the report. The number of participating agencies was rather small in the beginning, with participants tending to be in the larger departments. Enactment of Michigan Public Act 319 of 1968 greatly spurred the growth of the program by making the submission of the data mandatory. Smaller agencies began to increase participation since that time, and the data in this volume represents activity reported by 572 agencies.

Before using this report, it may be helpful to the reader to review the following general information regarding the UCR System:

(1) The crime figures presented in this issue are "police statistics" and are distinguished in this manner so that they are not confused with judicial or penal statistics.

(2) Crimes reported represent violations of Michigan statutes and local ordinances.

(3) Each reporting agency counts only those crimes or arrests for crimes committed within its jurisdiction.

(4) Offenses reported to the police are divided into Index and Non-Index offenses as outlined below.

(5) Offenses are compiled at the end of the month during which they became known. The police may become aware of the crime in several ways: reports of police officers, citizens' complaints, notification from the prosecuting attorney, court officials, or in some other manner.

(6) Offenses are included without regard to a) age of offender, b) value of property involved, 3) recovery of stolen property, d) arrests, or 3) action by prosecution.

(7) Complaints that are found by the police to be unfounded are not included in the crime tables even though as much time is often consumed on verification of the offense as there is in a solution.

Interpretation of the meaning of the terms "Index" and "Non-Index" crimes can be aided by a review of the following brief listing of general crimes included in each category:

1980 MICHIGAN CRIME IN A NUTSHELL

Total crime increased 4% in 1980 compared to an increase of 10% in 1979. The crime rate for total crime was 13,450 crimes per 100,000 population, or one reported crime for every seven Michigan residents.

Index crime increased 8% over the previous year. The index crime rate for 1980 was 6,585 per 100,000 population, or one reported crime for every fifteen Michigan residents.

The largest increase in index crime appears in the classification of Murder at 16%, but substantial increases are also seen in the crimes of Burglary and Robbery at 15% and 11% respectively. Decreases in specific index crimes are observed in Motor Vehicle Theft at 3% and Aggravated Assault at 2%.

Rural and Urban index crimes increased at a similar pace in 1980 with Rural at 10% and Urban at 8%.

Total arrests for 1980 decreased by 2%, which was the same rate of decrease indicated for 1979. Juveniles accounted for 14% of those arrested.

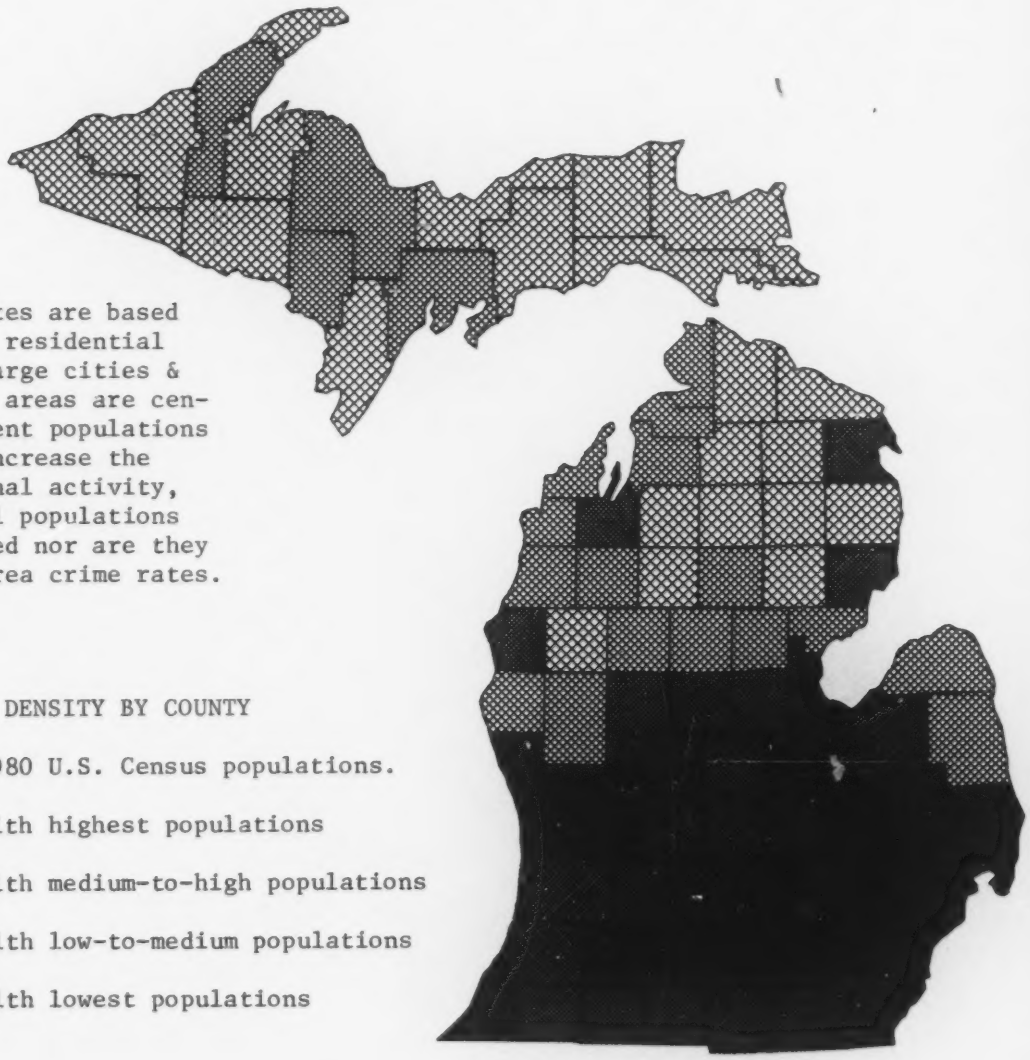
Geographically, Michigan's 8% increase for index crime was lower than the 9% increase reported for the North Central Region and the 10% increase for the Nation.

MICHIGAN

Michigan is 456 miles long, 386 miles wide, and its 58,216 square miles of land area place it twenty-third largest among the 50 states. Its two peninsulas are divided into 83 counties, and the U.S. Census Bureau indicates its 1980 population to be 9,238,634.

POPULATION DENSITY

Michigan's population distribution is characterized by dense concentrations in the south and sparseness in the north. Nearly half of the State's total population is clustered in southeast Michigan. Other metropolitan areas are located along major interstate highways I-94, I-96, and I-75. This map represents the number of persons per square mile.



NOTE: Crime rates are based on census-fixed residential populations. Large cities & certain tourist areas are centers for transient populations which tend to increase the amount of criminal activity, but such special populations are not estimated nor are they computed into area crime rates.

DENSITY BY COUNTY

POPULATION PYRAMIDS

A population pyramid is intended to graphically show the distribution of persons by age and sex. The theoretical pyramid shows an equal number of males and females with fewer individuals in each successive age cohort. Each bar shows the percent of the total in that age cohort, male and female, and the total of all the bars is 100%.

The pyramids displayed at the bottom show the characteristics of Michigan's 1979 and 1980 Total Arrests. When these pyramids are compared, we find that the 1980 male age cohort representing the arrestees in the 15-19 age group has decreased significantly with an increase in the number of arrestees in the 25-29 age group. The 1979 and 1980 female age cohorts show minimal change.
